Introduction

Since the launching of the health insurance program for the aged (Medicare) on July 1, 1966, the Social Security Administration has received a steadily increasing flow of inquiries about the benefits provided by the program, their availability and costs. Many of these inquiries originate with State and local agencies having responsibility in the health planning area. Other inquiries reflect the general concern shared at all levels of responsibility over the increasing amounts spent for medical care in recent years.

This publication is designed to provide a more convenient reference source for data on the operation of the Medicare program in the States. Selected items of information are shown for each State covering the 4-year period ending June 30, 1970. More detailed information is available in other Social Security Administration publications listed on page 2. A brief description of the program and definitions of terms used in this report are presented on page 3.

Explanatory Notes

BENEFITS OF THE PROGRAM

Hospital Insurance (HI): The portion of the health insurance program that pays a large part of the cost of inpatient hospital care, posthospital extended care, home health service visits, and, until March 31, 1968, outpatient hospital diagnostic services. Hospital insurance pays for up to 90 days of hospitalization per benefit period. The benefit period begins with the first day of hospitalization and ends 60 days after discharge from the hospital or extended care facility. Effective January 1, 1968, each hospital insurance beneficiary also has a "lifetime reserve" of 60 additional days of inpatient hospital coverage. These additional days can be used at the patient's option whenever the 90 days covered in a benefit period are exhausted. Except for hospitals certified to provide emergency services only, payment is subject to the hospital's participation in the Medicare program, an annually adjusted deductible and copayment for the 61st through 90th days of hospitalization per benefit period. At the start of the program, the deductible was $40 and the copayment $10 per day. Beginning January 1969, these respective amounts were raised to $44 and $11 and beginning January 1970, to $52 and $13. Days used from the "lifetime reserve" were subject to copayment of $20 a day in 1968, and $22 a day for benefit periods beginning January 1969 and $26 beginning January 1970. Inpatient services in a tuberculosis or psychiatric hospital are included, with a lifetime limit of 190 days of covered services in psychiatric hospitals.

Hospital insurance also pays for all covered services in participating extended care facilities (ECF) for the first 20 days of such care per benefit period, following discharge from a hospital after a stay of 3 days or more, and within 14 days of discharge. The program pays for as many as 80 additional days in the ECF in the same benefit period, subject to a copayment of $5 a day in 1967 and 1968 and $5.50 for benefit periods beginning in 1969, and $6.50 beginning in 1970. Up to 100 home health service visits provided by participating home health agencies are covered in the 12-month period following discharge from a participating hospital or extended care facility. Home health services must be established by the attending physician within 14 days after discharge from the participating hospital or extended care facility.

Supplementary Medical Insurance (SMI): The part of the program that provides payment for physicians' services, including home and office visits, up to 100 home health service visits per calendar year without prior hospitalization, outpatient hospital therapeutic services, outpatient physical therapy services, and after March 31, 1968, all outpatient hospital services, diagnostic X-rays and laboratory tests, radiation therapy, prosthetic devices, purchase or rental of durable medical equipment, ambulance services, and surgical dressings, splints, casts, and similar devices. After the beneficiary has paid the first $50, SMI pays for 80 percent of the allowed charges for covered services during the calendar year. Expenses incurred in the last quarter of a calendar year and applied to that year's deductible may also be applied to the deductible in the following calendar year. However, after March 31, 1968, the provisions concerning the deductible and the coinsurance do not apply to the services of radiologists and pathologists furnished to hospital inpatients.

DEFINITION OF TERMS

Persons enrolled for:

Hospital Insurance (HI): Persons who are eligible for hospital insurance and who have established entitlement to benefits by filing application with the Social Security Administration.

Supplementary Medical Insurance (SMI): Persons eligible for supplementary medical insurance who elect to enroll in the SMI program and agree to pay a monthly premium, or have this amount paid in their behalf by a State welfare agency. The premium was $3 a month prior to April 1, 1968, $4 from April 1968 through June 1970, and $5.30 beginning July 1, 1970.

Hospital and/or Supplementary Medical Insurance: All persons aged 65 and over who enroll under hospital insurance and/or supplementary medical insurance. This total is larger than the total for hospital insurance because a small number of persons are eligible for medical insurance but not for hospital insurance.

Amounts reimbursed:

HI: Amount paid by the intermediary to a provider for that part of covered services exceeding deductibles and coinsurance amounts. Includes outpatient services prior to April 1, 1968.

SMI: Represents 80 percent of charges for covered services each year after the individual has paid a deductible of the first $50 of such services during the calendar year. The amount of charges must be classified as allowable by the carrier. Reimbursements for outpatient services April 1, 1968, and thereafter are included in the SMI totals.

Participating facilities:

HI: A hospital, extended care facility, home health agency or independent laboratory. A provider of services is eligible for participation and payment if it meets the requirements for certification and has entered into an agreement with the Social Security Administration to provide services on a nondiscriminatory basis in compliance with Title VI of the Civil Rights Act of 1964, and not to charge any patient or other person for covered items and services except deductibles and coinsurance amounts.

Short-stay hospital: General and special hospitals reporting average stays of less than 30 days.

Long-stay hospital: General and special hospitals reporting average stays of 30 days or more, as well as tuberculosis, psychiatric, and chronic disease hospitals.

Extended care facility: An institution which is primarily engaged in providing skilled nursing care and related services for patients who require posthospital medical or nursing care or rehabilitation services. Excludes institutions which are primarily for care and treatment with respect to mental diseases or tuberculosis.

Beds: Adult hospital beds include beds regularly available for use by inpatients. Excludes bassinets and pediatric beds, and beds in facilities that are set up and staffed only for patients receiving special procedures for a portion of their stay, or which are used only as holding facilities prior to transfer to another hospital.

Home health facility: An agency which furnishes services to a patient in his home by providing skilled nursing and other therapeutic services under a plan established and supervised by a physician. Services may include: Part-time nursing; services of a home health aide; physical, occupational, or speech therapy; medical social services; and medical supplies (except drugs) and equipment.

Independent laboratory (SMI): A laboratory independent of a physician's office or a hospital which performs diagnostic laboratory tests ordered by a physician.
